Directions:

The tag book has 10 tag pages, you will need a binder ring (generic office supply store) to hold the pages. I notched each pages corners at the top with only small notches to make them into tags and punched holes at the top middle with a regular paper hole punch. The last page is made from the chipboard in the ephemera packaging. Unless otherwise noted, all stamping is done in Tuxedo Black Momento ink. All pictures are 3x4 with a mat size of 3.25x4.25. You can decide to not have a photo mat, change the size to suit your own photos or change the paper. This collection works well together so you can't go wrong with substituting different papers to suit your preferences or needs.

*Tip for attaching vellum ephemera – use a glue dot behind solid image to hide the adhesive. For example the 3 heart vellum pieces, put a glue dot behind one of the hearts to attach.
